

Like you, I care deeply about working together to make Sydney Uni Sports & Fitness the best sports organisation for all students and members of our community.

I've been part of the SUSF and Sydney Uni community for nearly a decade. Having seen the University from many angles, including 3 years on the University Senate – I have a deep appreciation for the amazing work our clubs, sportspeople and members do.

I'm asking for your support as President, because I want to serve all sports in their commitment to excellence and our community.

The following are key points of my vision for SUSF:

- **You and your clubs should receive access to the resources, support and facilities you need – this is my ongoing commitment to you.**
- **Every club and member deserves to be heard. I'm committed to transparency and listening to your needs.**
- **You and your clubs deserve stability. I will work with the University to develop a sustainable funding model – so we can continue to plan and grow into the future.**
- **Our relationship with the University is critical – we need to further explore all opportunities for expanding facilities and funding. I believe I have a unique opportunity to do this with my experience and relationships with Senate.**
- **We should support our Elite Athletes by expanding scholarships and resources through increased philanthropy.**
- **We have a great opportunity to increase participation by all students, through working with the University to expand existing programs and develop new ones.**
- **Our staff should be supported to grow and learn to the best of their ability, such as giving them access to mentoring and University courses.**

- **Our Alumni are an amazing asset, and should be better engaged in the outstanding work and achievements of SUSF.**

We have an amazing opportunity to build on our existing strengths and establish the next horizon for SUSF. I believe that working together we can achieve this –so I'm asking for your support in this election.

Please vote 1, James Flynn for President.
